Job Titles for African American Studies

Agencies and organizations in the public and private sectors need staff capable of working with individuals of all backgrounds; therefore, a major in African American Studies greatly enhances an applicant's ability to meet position qualifications. All students are encouraged to consider a double major which combines African American Studies with another academic discipline, such as sociology, psychology or business to ensure their knowledge, skills, and special insights are exceptionally marketable. Below is a list of occupations that many African American Studies Majors pursue. Some of these jobs also require education beyond a bachelor's degree. *For information about these and other careers, please go to www.onetonline.org/.*
