Job Titles for Anthropology Majors

A career in anthropology provides the opportunity to explore the relationship between cultures and people, and to gather and analyze data that deals with social organization and interaction. Jobs for students with degrees in Anthropology are available in many different areas, depending on the emphasis developed within the major. Jobs are available in contract archaeology, community services, education, research, museums, and - to a certain extent - business, industry, and government areas where cross-cultural concerns are important. Career opportunities in anthropology may be quite competitive. *For information about these and other careers, please go to www.onetonline.org/.*
