## Job Titles for Aviation Management/Technology Majors

There were about 76,000 pilots, copilots, and flight engineers outside of the military in 2008 earning an average wage of \$119,750. Applicants need at least 1,500 hours of flying time to be seriously considered by a major airline. Small regional airlines continually hire pilots with less than 1,000 hours of Pilot in Command time. There are also many fixed-base operators in need of aviation professionals who understand the industry. For information about these and other careers, please go to [www.onetonline.org/](http://www.onetonline.org/)
