## Job Titles for Computer Science Majors

The Computer Science major prepares students wishing employment as a software engineer or in a technical area related to Computer Science. The demand for professionals in this field, combined with the relevant curriculum, leads many students to have full-time employment in this area prior to graduation. In addition, there are numerous opportunities for high-paying placement during college through Metro State's Cooperative Education Program. Employers involved in the Cooperative Education Program often permanently hire placement students following graduation. *For information about these and other careers, please go to [www.onetonline.org/](http://www.onetonline.org/).*

<b>Hardware Engineer</b>	<b>Application Developer</b>	<b>Computer-Aided Designer</b>
