CAREER

Job Titles for Psychology Majors

A career in psychology offers many rewards including the opportunity to assist people with personal, family, social, educational, mental health, and career decisions. Psychology provides a solid background for entering fields as diverse as personnel management, addictions counseling, elementary and secondary school teaching, and criminal justice. Most of MSU Denver's Psychology majors plan careers in counseling. Psychology serves as a springboard for many psychology graduate programs at the master's and doctoral level including the fields of clinical counseling, school, industrial/organizational, health, forensic and sports psychology; educational psychology (psychological test development, school psychology). The doctoral level degrees can lead to teaching at the college and university level, as well as various positions in governmental agencies and the private sector. In addition, many students seek advanced degrees in related fields such as education, business management, law, criminal justice, nursing, social work, or public health. Duties depend on the individuals served and the work settings. The demand for well-qualified people is expected to grow as fast as the average for all occupations through 2010. For information about these and other careers, please go to www.onetonline.org/.
